

Viesca Toscana

2020 Update + Health & Safety Protocols

VIESCA
TOSCANA

PLAN TO RE-OPEN:

Private villas have remained open, with individual suites opening July 1st.

SERVICES:

We will offer all usual services even if there will be some variations to guarantee the highest hygiene and safety standards. The only exception will be the restaurant where we will begin a new service so that breakfast can be delivered to the suites via room service. For lunch and dinner on the restaurant premises, it will be necessary to monitor the number of guests and to space the tables accordingly. However, we don't anticipate this being an issue as we have a large terrace in front of the restaurant.

HEALTH & SAFETY PROTOCOLS:

We will rely on experienced consultants to provide us with constant updates on the most suitable response to specific health, hygiene and safety issues, all in compliance with Italian government rules and protocols.

All rooms including air conditioning devices will be cleaned and sanitized with certified professional products and our staff will receive specific training with constant updates. If needed, reception will provide our guests with contacts to English speaking doctors.

GOOD TO KNOW:

Advisors and clients can be certain that our property will commit, as it has always done, to the highest standards in terms of hygiene and safety, and that they will be informed on anything they will possibly need to know in terms of personal protection during their stay.
